

Ride the Science Wave—Online

The American Association for the Advancement of Science (AAAS), publisher of the journal **Science**, has developed a set of **complementary online resources and services** that NIH staff can readily access. In addition to delivering **Science** (the journal) to your desktop computer, **Science Online** gives you access to

matically to your **email** address twice a month.

Science Now posts **news** items of interest to the scientific community **each week day** and **Science Careers** lists job openings, job fairs, graduate programs, and **meetings** of interest to the same audience.

Access to the journal **Science** and most of the other resources on **Science Online** is provided to NIH staff through an **agreement** between **AAAS** and the **NIH Library**. However, the NIH Office of Intramural Research pays for access to **Science Next Wave**.

which can be downloaded to your PC, or through the Ovid **Web Gateway** at <http://nih-library-databases.nih.gov>. For detailed instructions on downloading the interface, visit the NIH Library's Home Page at <http://nihlibrary.nih.gov/elecres/medlineovid.htm>. Remember to use your Institute abbreviation as both the user id and password during login. The database covers articles indexed from **1992 to the present** and it is **updated monthly**.

N.B.: The current awareness service, **Ovid Alerts**, is available when you use the Ovid **Web Gateway** to search MEDLINE. You can set up an e-mail alert, a **recurring search** strategy that will deliver **new results monthly** to your e-mail address. Please see <http://nihlibrary.nih.gov/Elecres/OvidSDIletter.htm> for instructions on establishing this service. Call the Library at 496-1080 for technical or search assistance.

On-Target with Ovid MEDLINE

Science Now, **Science Next Wave**, and **Science Careers**. Point your browser to <http://www.scienceonline.org/> or go to it from the **NIH Library's home page** (<http://nihlibrary.nih.gov>) under Electronic Resources, Online Journals.

The **full-text** of the journal **Science** is available **from October 6, 1995 to the present**. Tables-of-contents only are available for June 30, 1995 to September 29, 1995. Articles not available online can be requested from the NIH Library.

Science Next Wave contains **news** and stories on the job market and job hunting, transitioning to a new career, family and **career issues**, women in science, and science's **big debates**. It includes **forums** for discussion of issues raised by *Next Wave* features and the exchange of career advice. *Next Wave* news and feature **summaries** can be **delivered auto-**

Searching MEDLINE using the Ovid interface recently **got easier** as a result of its incorporation of several new, **straightforward** yet **advanced** search features which allow you to **target** the **articles** you need. Ovid's **mapping function** maps your entry terms to Medical Subject Headings and offers potential subheadings to help you further refine your retrieval.

At the heart of the interface is a multi-line search screen that helps you search and **combine multiple concepts** with ease. You also can **save retrieval** to a file, **download citations** to bibliographic management software such as Reference Manager or **EndNote**, or **e-mail results** to an NIH colleague.

Ovid MEDLINE is accessible either through the Ovid **Windows** interface,

LOANSOME DOC Alert

The Library has been **testing** an **electronic document delivery** system with a small group of Loansome Doc users. This system delivers articles by **e-mail or fax**, but to receive by e-mail you **must install a viewer** on your personal **computer**. Some NIH staff who **did not sign up** to be part of the test group inadvertently may have received articles this way as well. If you have received copies of **journal articles by e-mail** and had **difficulty** reading them, or if you have received a **faxed** copy of an article and don't want them delivered that way, please contact Rosalie Stroman, 6-4651 for instructions.

New Arrival - Harrison's Online

The NIH Library takes pleasure in announcing the **newest** member of its expanding collection of **electronic resources**, *Harrison's Online*. If the name sounds familiar, it's because this new resource is the **online counterpart** to the **14th edition** of Harrison's *Principles of Internal Medicine*. Not only does it contain all the material found in the print version, *Harrison's Online* contains both **new and revised content**. Harrison's editors and contributors update this enhanced material regularly. You can find late-breaking **clinical trial data**, updated therapy, links to related **web sites**, and added illustrations. The bibliographies at the end of chapters contain active **links to PubMed**. These links will let you order the document using Loansome Doc. You can even test yourself on what you've read by **taking self-assessment tests**.

To access *Harrison's Online*, go to the Library's home page <http://nihlibrary.nih.gov> and click on the Electronic Resources page. And, as always, if you need any **help**, call the Library at **496-1080**.

What's Up, Doc? The Latest on Internet Grateful Med

A **new version** of Internet Grateful Med (IGM) was released in early **September** with many new, useful features. Because IGM is now searching MEDLINE using the retrieval engine of NLM's PubMed database, several of the **same features** available in **PubMed** are now available in IGM including **links to the full text** of participating **online journals** and the ability to see **related articles**. Important features such as **document ordering** are still available. An IGM exclusive is that, in addition to MEDLINE access, users can now **search** many **other NLM databases** such as **Toxline**, a database of toxicological effects of drugs and other chemicals, and **Bioethicsline**, a database on ethics and related public policy issues in healthcare and biomedical research. Visit the IGM web site at <http://igm.nlm.nih.gov> and see the new Internet Grateful Med for yourself.

We Get Letters

Have you ever searched the Library's online catalog and wondered why the **NIH Library doesn't own** the **book or journal** you are looking for? Did you hesitate to fill out a **Suggestion** form because it's just too much trouble? If so, it just got a lot **easier**. Go to the Library's Home Page at <http://nihlibrary.nih.gov>, click on **"Requests"** and then click on "Suggestion for Book/Journal Acquisition." Identify yourself and tell us which book or journal you would like to recommend. Before you submit your request, take a moment to review the Library's **selection criteria**. You also can make book or journal suggestions through the Web version of the Library's online catalog at <http://nih-library.ncrr.nih.gov/>.

Back, Back, Back...

Recent additions to the backfiles of the **Web of Science** database **now** allow you to **search** for information from the journals published since **1987**. Files going as far back as 1980 will be loaded soon. The *Web of Science* is found at <http://publisher.perish.nih.gov>.
